**(Fees required by 4/2/10... to be invoiced submit PO)(Cancellations must be accepted by Executive Director)
(No cancellations accepted after 4/2)**

Please join us for this intense but enjoyable two-day NICET Fire Test Prep class. At the end of the course you will be organized and ready to take the NICET Level II fire alarm certification exam. Instructions on how to complete the test application for the "pencil & paper element exam" and other NICET forms, as well as some test-taking tips and strategy will be provided. Course subject matter content is primarily drawn from NFPA 72, a copy of which will be provided to you at the class. Instructor, Greg Kessinger, will aid you in compiling your own **Personal Test Taking Notes** that you can take into the exam with you, as well as give you a short sample test at end of class. Recognized as one of the industry's premier fire alarm code trainers, Greg Kessinger is a NICET Level IV Sr. Engineering Technician, an NFPA Certified Fire Protection Specialist, and an IMSA Certified Interior Fire Alarm Technician. For over 10 years, Greg has written Security Dealer & Integrator's "Grill the Fire Alarm Expert" column.

If you have been meaning to take this exam the time to act is NOW. Don't procrastinate as this year is the last chance to take the Element exam based on the 2002 edition of the national fire alarm code. Starting soon, the exam will be only pass/fail and you will not be able to build on passed elements. This seminar carries 1.6 ESA CEU's
